EDUCATION.

Arizona State University

Tempe, Arizona
2001-2005
Bachelor of Science in Design/Graphic Design

ABOUT ME.

I'm similar to a swiss army knife. That being said, some blades are sharper than others. As a designer, I believe it's important to be well rounded and have a wide range of knowledge. I take great pride in my Photoshop skills. This is the seed to all my work and I believe is my greatest strength. For me, every project at some point passes through photoshop. My love for making my work interactive has made me progress with Adobe Flash. I am very comfortable with Action Script 2.0 and slowly moving into AS3. Recently with Apple/HTML5 crushing my love for flash, I started a shift towards Adobe After Effects and this is where I belong. I'm also intrigued and working on sharpening my 3D skills. I also have a solid understanding of HTML/CSS. I take pride in being able to direct a project from sketch pad to completion and always using my sharpening stone along the way.

WHAT I WORK WITH.

Operating Systems

Mac OSX
Windows

Interactive/Motion

Adobe After Effects
Adobe Flash

3D Rendering

Cinema 4D

Office/Presentation

Adobe InDesign
Adobe Acrobat
Keynote
